

GRADE VI CLASS REPRESENTATIVE

REPORT

Your lessons today can be passed on for generations. You aren't just teaching your current students, but all of the people they will teach and interact with.

This report is comprised of the efforts and achievements made by Grade VI during the session 2020-2021. With the onset of a very difficult situation loss of children's studies was something we had to fight and when we joined hands against it and that's when our kids readily accepted 'Online Teaching'.

Slowly and gradually these classes became the new normal. We danced, acted and singed along with the whole class while being at the safety of our homes. We celebrated each special day including Mother's Day, Earth Day, Yoga Day, International Day of Non- Violence, World Students Day and many more were celebrated all online. To promote engagement levels, build confidence and create connections, we tried to take the children out through the virtual excursions to Egypt ,National Museum of National History in Washington DC and Aquatic museum.

Grade VI students also actively participated in the Fit India Movement. Free hand exercise session was conducted by Sports team which motivated the kids to relax, reduce their anxiety and keep healthy.

Children infact also presented special assemblies all independently. They researched they learned more and now each of the child is all an expert.

To make our children achieve this we as teachers have worked day and night. We learned the everything from the basics of PowerPoint to complex apps like Mentimeter, Kahoot ,Google classroom, cells alive ,Chem think, Epic Unlimited book for kids and many more.

How to capture the child's attention span how to make them understand all these were the dilemmas that we fought all through and nurtured ourselves into a teacher your children are now learning from.

Students have performed so well. As a class representative of Std. VI. I feel so proud in sharing some pictures of our students are learning practically virtual via apps like Flipping, PHET simulations, Wordwall, I-Naturalist , Paxton comic maker ,Vyon ,Quiz makers.

I would like to conclude by appreciating the efforts of the parents, who have made the new learning environment as successful as it had been. We look forward to seeing everyone as soon as possible. Stay Home Stay Safe

Please see few pictures to witness a very positive change on education due to Covid 19.

A GLANCE AT GRADE VI:
