TOGETHER TOWARDS TOMORROW

K.R.MANGALAM WORLD SCHOOL,
VAISHALI

PRINCIPAL'S ADDRESS

"The whole purpose of education is to turn mirrors into windows."

– Sydney J. Harris

A school imparts knowledge to children, develops their skills, instils in them sound values, and nurtures their curiosity for lifelong learning. It sets the context for their future learning, and prepares them to be self-motivated and self-directed learners. It also shapes their physical and mental health, and provides them with the environment for holistic development and well-being.

With so much of dramatic transformation taking place in the field of education, it becomes indispensable for educators to accept, adopt and acclimatize to this much needed social change. Having gone global and thrown open our doors to the winds of change, we have a ground breaking and innovative system of education in place, where paramount importance is given to developing and honing values of Indianess and good citizenship, thereby enabling the 21st century learners to take pride in and valuing their identity with introspection and ingenuousness.

Today, the role of a school is not only to pursue the academic excellence but also to motivate and empower the students to be lifelong learners, critical thinkers, and productive members of an ever-changing global society. Converting every individual into a self-reliant and independent citizen, our school provides an amalgam of scholastic and co-scholastic activities.

A committed and supportive management, devoted teachers, caring and co-operative parents teach our children not just with their minds but also with their hearts, making learning enjoyable, purposeful and inclusive, and shaping them to be emotionally intelligent. They inspire our children to believe in themselves and think big, with a growth mindset. The reflection of the student's creativity is the quintessence of this magazine. I am sure that the positive attitude, hard work, sustained efforts and innovative ideas exhibited by our young children will surely stir the mind of the readers and take them to the implausible world of unalloyed joy and pleasure.

V.C PACHAURI
Principal

FROM THE EDITORIAL

Dear Readers

Once again, we are delighted to put forth the new issue of our creative child - SAAKAR. This month was very special for both the students as well as the teachers. For the teachers, it's a month of their celebration, to bask in the love and reverence of their darling and doting students and for the students this is the best time to showcase their affection for their guides and mentors. The activities mainly hovered around the juniors as the seniors were busy preparing for their D day. But our student-teacher combo left no stone unturned to reach the pinnacle of their potential. This zest and vigour is what makes this combination awesome. As is rightly said, 'The task of the excellent teacher is to stimulate 'apparently ordinary' people to unusual effort. The tough problem is not in identifying winners: it is in making winners out of ordinary people.' And this is exactly what our teachers aspire to achieve.

Happy Reading!

VEGETABLE PRINTING ACTIVITY GRADE NURSERY

“The delicate sweetness of just – picked vegetables is always worth savoring!”

Taking this thought further teachers of Grade Nursery planned Vegetable Printing Activity on 16th July 2022.

Vegetable printing is a simple art that even small children can try out. The students were guided to do vegetable printing with the help of different vegetables like bitter guard, onion, ladyfinger etc. and different color. They enjoyed doing the activity and had fun in vegetable printing.

RAINY DAY ACTIVITY REPORT GRADE -K.G

The first drops of rain always bring a smile on our faces. ‘Rainy Season’ or ‘Monsoon’ the beautiful season of the year is a gift of God to mankind. It revives our souls and fills the surroundings with the beauty of fresh greenery. To acknowledge this blessed gift of God, students of Grade KG performed a craft activity on 15th in the month of July 2022. They made a cloud with some rain drops . Students further pasted cotton on the clouds and completed the activity. It was an enriching and learning experience for them.

Go ahead
and get

enjoy!!

MATHS ACTIVITY : 'WHEN ADDENDS CATCH THE SUM'

"Mathematics as an expression of the human mind reflects the active will, the contemplative reason, and the desire for aesthetic perfection."

Mathematics expresses itself everywhere in almost all facets of life. It develops computational skills, critical thinking and problem-solving skills.

The students of Grade II zealously performed an activity titled ‘When Addends Catch the Sum’. This activity gave students a platform for application of knowledge. They were able to incorporate varied theories of learning that solidified their concept.

We
practice
what we
learn !

EVS ACTIVITY: ‘JUST BREATHE’

GRADE -II

Learning about our body is a great way to get kids interested in science and learning about how we breathe is a great way to start.

K.R. Mangalam family is constantly on its toes to ensure play-based learning that can stimulate curiosity and build lifelong learners.

Engineers use models to study complicated processes and better understand them. The students of Grade II performed an activity, where they acted like engineers by building models of lungs in order to study the breathing process. The students thoroughly enjoyed this activity which also harnessed their scientific curiosity.

Our little engineers at work!

“NEED TO BE OUR OWN HEROES”

It is rightly said that little celebrations paves the way for awareness and consciousness to blossom. With this intent, the students of Grade II celebrated ‘World Population and World Malala Day’ through the collage-making activity with a vital message of women empowerment. It is a vital thing that needs to be accomplished through education. The rights and freedoms that women have today are the results of the fights that the empowered women fought against it. The students were encouraged and understood that their power and courage are stronger than the campaign of fear.

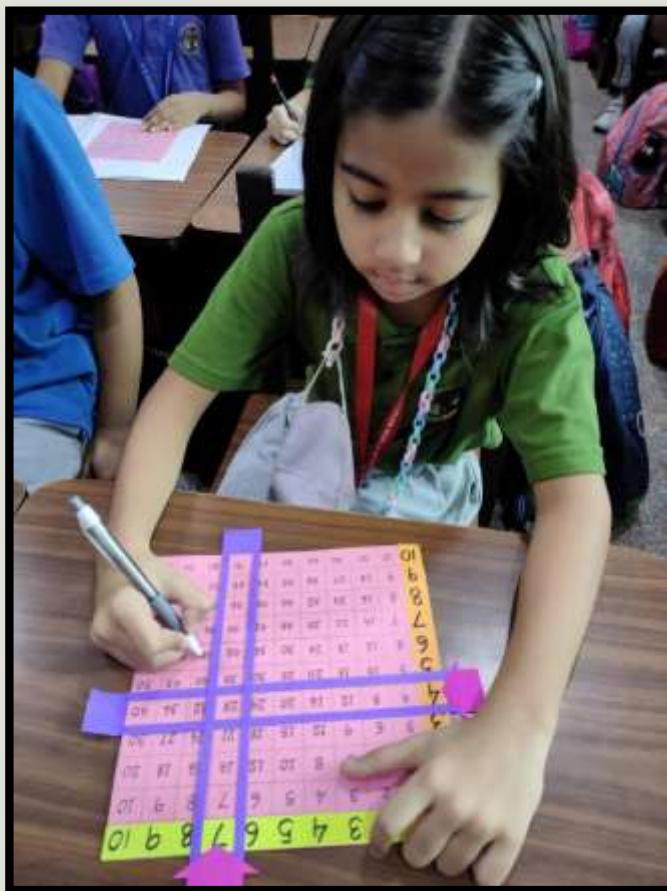

MATHS PBL ACTIVITY

REPORT

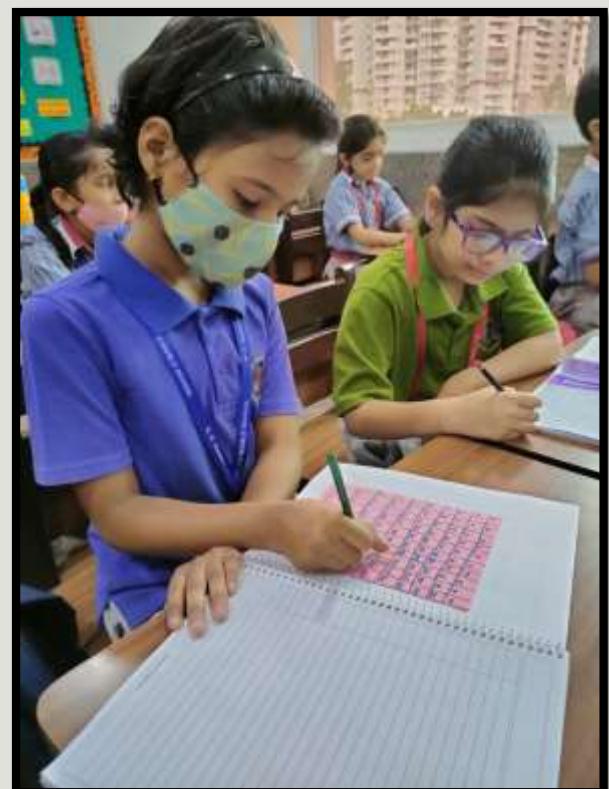

GRADE III

Maths games and activities help our children develop an enthusiasm for numeracy. It engage them in the subject and help them see a purpose in what they are doing. Times table is one of the most important concepts for learning Maths and when children successfully recall their times table they grow in confidence, which will not only help them tackle more challenging maths problems, but also helps to keep them motivated and engaged across other subjects too.

Keeping the benefits of Times Table in mind, PBL activity was organised for the students of Grade III. Students enthusiastically made the tables grid and found it the easiest and funniest way of learning it.

In making of Times Table Grid

Focusing on multiplication concept

Finding result

PBL ACTIVITY

SOCIAL SCIENCE

GRADE-IV

India is a land of diversity from culture, and economy to landscapes. Its heterogeneous physical features make it an interesting subject for a geographer. It is a delight to teach acquire and impart knowledge to the students about the vast range of physical features of this country. To give an overview and insight into the heterogeneity of this beautiful country, an activity was organised to make our students aware and develop geographical understanding. The creative minds used clay of different colours and blended it on a physical map of India. This activity aimed to make the students appreciate and understand the physical features of India from a broader perspective.

**“Everything is theoretically
impossible,
until its done”**

It always seems impossible until and unless you have actually been able to achieve it. Keeping this thought in mind, students of Grade 1 performed an experiment with Baking Soda and Vinegar and the result they got was unbelievable. With this activity, their curiosity changed into learning and this experience motivated them to do more experiments like this and gave them the idea of learning by doing.

THE INVESTITURE CEREMONY

"Leaders are not born, but are made by their experiences in their life"

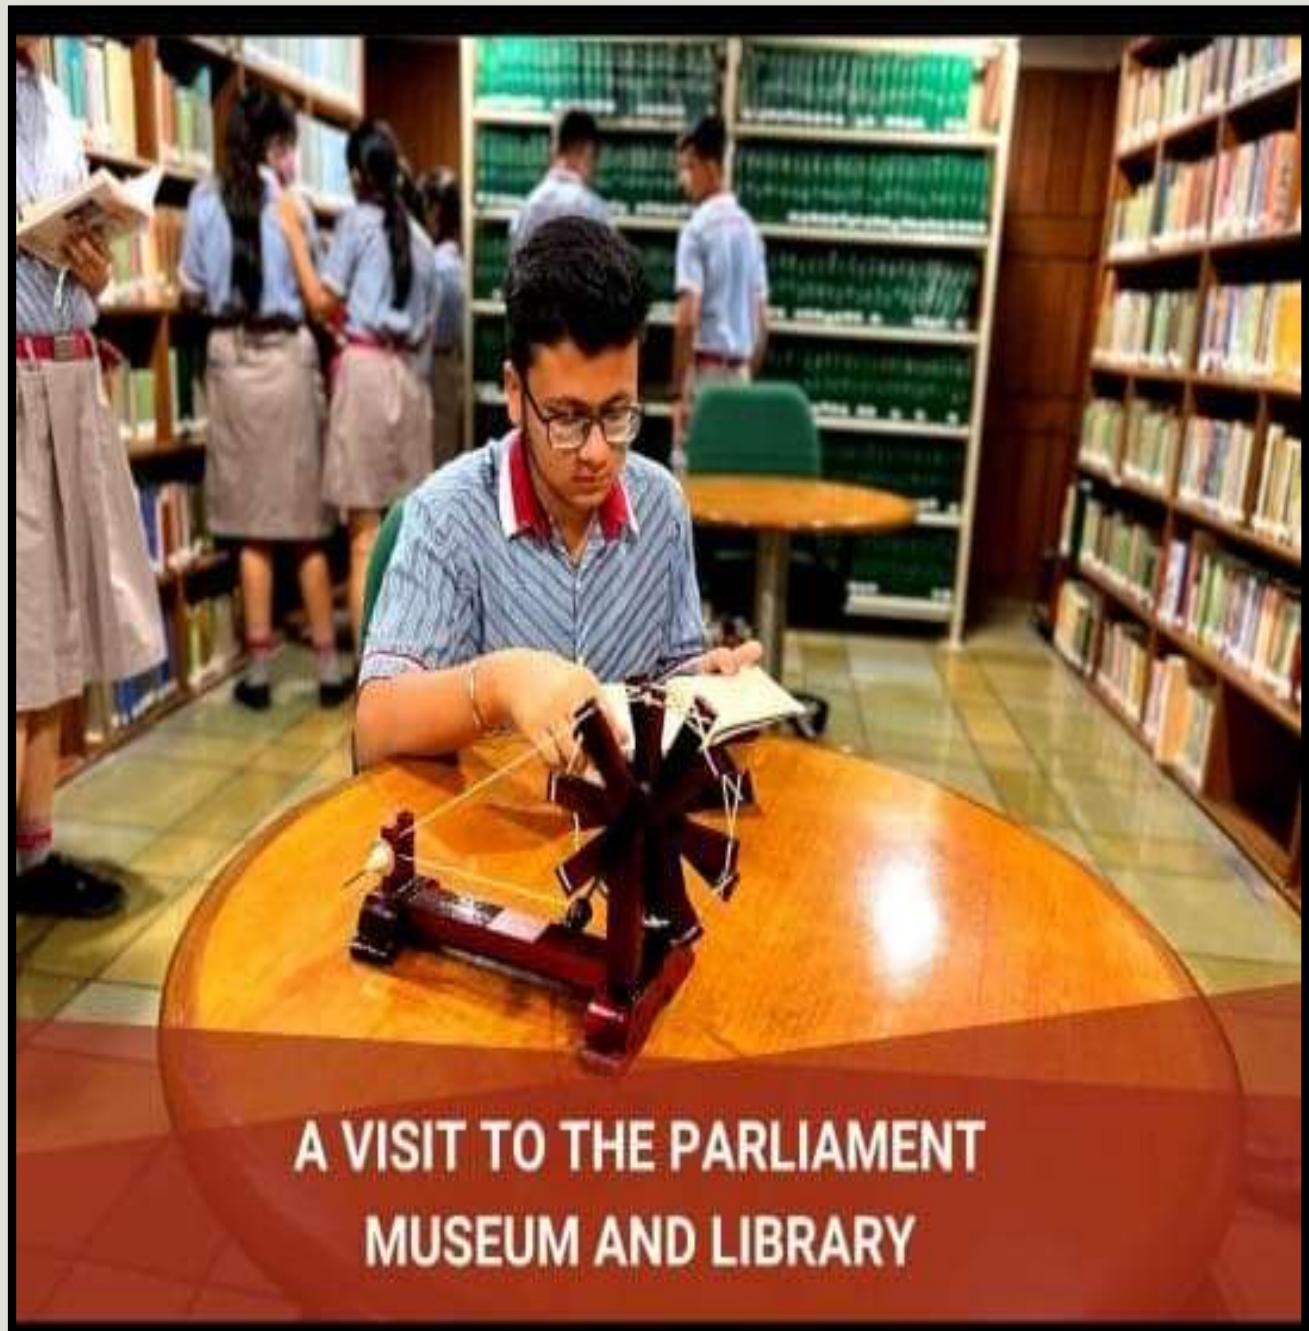

The momentous day of investiture ceremony downed at our school on 5th August 2022, to bestow responsibilities on the deserving young talents of the Students' Council to lead the school on its forefront with their sheer commitment, confidence and competence.

It was an occasion where young minds donned the mantle of leadership and took the charge of responsibilities entrusted to them by the school.

COLLAGE MAKING ACTIVITY GRADE NURSERY

*Give junk food the boot and switch to fruit.
Decide what to eat and make you feel great
Junk food go away, because fruit and vegetables
are here to stay.*

Our diet is a bank account as good food choices are good investments. Healthy eating is a way of life.

Taking this thought further, Grade Nursery teachers planned a Collage-Making Activity for their students. AS, Collage making helps children to learn skills, experimentation with different resources open doors for creativity and innovation to blossom.

The students were guided to make a beautiful collages with the help of the cutouts of healthy and junk food. They enjoyed doing the activity and had fun making the collage.

"Healthy food for a wealthy mood"

"Healthy food for a wealthy mood"

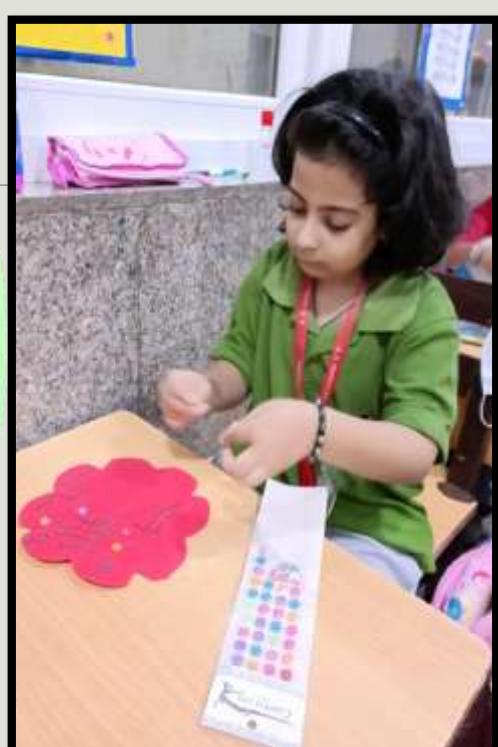

FRIENDSHIP DAY, GRADE II

“FRIENDSHIP DAY IS JUST AN OPPORTUNITY TO LET OUR FRIENDS KNOW THAT WE VALUE THEIR PRESENCE IN OUR LIVES.”

IN TUNE WITH THE SPIRIT OF THE OCCASION OF FRIENDSHIP DAY, STUDENTS OF GRADE II SHOWCASED THEIR CREATIVITY BY MAKING FRIENDSHIP DAY CARDS.

GRADE-II ENGLISH PBL ACTIVITY

English is a complex language, and often, children can get overwhelmed. We love to teach them in a way that is colourful, entertaining and gives them a pleasant learning experience. The students of Grade II performed the ‘Pronoun Memory Game’ that indurated their concept.

INDEPENDENCE DAY CRAFT

“Let freedom reign. The sun never set on so glorious a human achievement.”

— Nelson Mandela

Independence day reminds us of our founding fathers who envisioned and *realized the foundation of the dream of a free India*. The students of Grade KG marked their way of celebrating Independence day this year. As we all know, this time, we are completing 75 years of independence, and the students and teachers wanted to add a different taste to the celebrations. Thus, kids made three paper folding fans, each signifying one colour of the Indian flag and pasted them on a ribbon. The entire craft looked unique, in which efforts put in by the kids were clearly evident.

Freedom is
never given;
it is won

Happy
Independence
Day

Proud to
be an
Indian

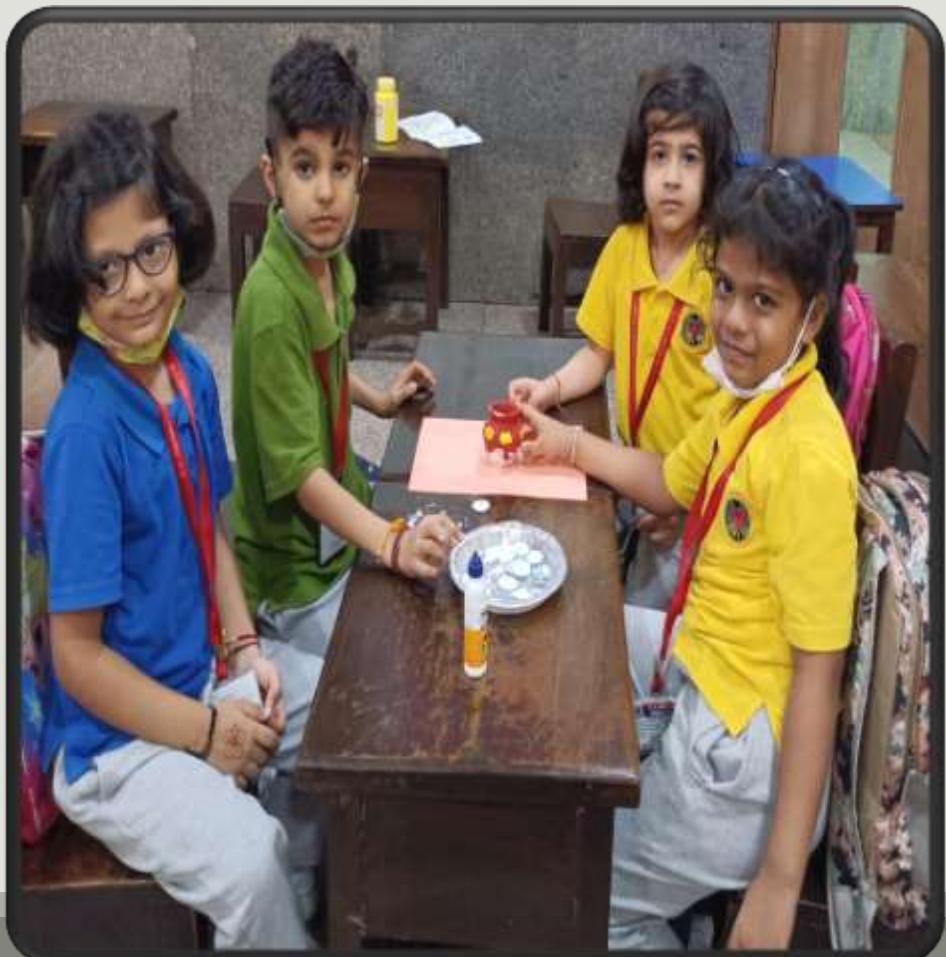

JANMASHTAMI CRAFT ACTIVITY

**“Sweeter than honey, tastier than curd,
pleasanter indeed than any happiness
and joy is the company,
is the power of the name of Krishna.”**

The birthday of Lord Krishna is celebrated with great devotion and enthusiasm, in India. To celebrate the extraordinary bond between children and the Almighty, students took the opportunity to decorate the Dahi Handi. They used paint colours to paint their Handi and then decorated it with glitters and mirrors. It was a pleasure to watch their petite fingers at work, making colourful and artistic Handi and having fun. Overall, the students thoroughly enjoyed the activity.
